To our regional community healthcare and human service partners:

Over the next two years Excelsior Wellness will be conducting a major construction project at our main campus in NW Spokane and our additional locations are operating at capacity. Therefore, we are looking for space provided by our regional community partners to locate several of our employees (administrative and service delivery).

Our providers serve the region and would benefit from locations outside Spokane County. We would like to provide multiple locations to improve the experience of our employees and increase accessibility of our community participants.

We are interested in locating space within Spokane and surrounding counties in Eastern Washington, including:

- Cheney
- Airway Heights
- East Valley
- Colville
- Spokane

We are also in need of collaborating with community providers who have available space in the following cities:

- Lacey
- Olympia
- Richland
- Yakima
- Wenatchee

We would prefer to support community providers with lease income in exchange for space they are no longer using or space they believe would allow for more integrated partnership with our continuum of services (medical, mental health, substance use, education).

If you have space you think would meet our needs, please reach out to Lynn Suksdorf (509) 559-3100 or Lynn.Suksdorf@ExcelsiorWellness.org to discuss opportunities.

Best regards,
