1	It's lengthy but I'm not really willing to cut much out of this. I feel like it hits all of the key social determinants of health.	7/31/2017 4:04 PM
2	I would like it to include improving health equity. Cultural competency is nice, but does not always address health equity issues.	7/24/2017 2:19 PM
3	Maslow's hierarchy? Safety? It's in there, but not directly stated...	7/24/2017 11:30 AM
4	Need physical activity through multimodal transportation because: 1. provides accountable care 2. provides improved physical and mental health	7/24/2017 8:32 AM
5	Too pie in the sky hope - needs to be more realistic.	7/21/2017 3:06 PM
6	The first paragraph is too long. The second section is better. The 2021 goal statement is more direct filling and broad. The other vision statement long sentence makes no mention of health or wellness.	7/21/2017 2:59 PM
7	Integration is the key to success	7/21/2017 2:46 PM
8	Should be revised to: By 2021, our region will have integrated community systems, accountable to improving health through delivering culturally competent, whole person care.	7/21/2017 2:35 PM
9	What about health care? Mental health care? If they can't access that, housing and food doesn't mean much. How does this include those that cannot ever "work" in the traditional sense due to a disease such as multiple sclerosis, schizophrenia, etc.?	7/21/2017 2:22 PM
10	that pays the bills with some left over for savings - this does not sound like a vision statement. I would include to the best of someone's ability as abilities vary optimal life could work	7/21/2017 1:35 PM
11	change "a productive, high quality life" to "a healthy and productive high quality life"	7/21/2017 11:07 AM
12	It's great in that it is holistic and I love the comprehensive nature. But the pendulum has swung so it doesn't actually call out physical health or access to health care. We need a clear tie among the physical, social, emotional, psychological, and environmental aspects. And since the whole point of transformation is transforming the care system to work together in order to achieve all of the things you have mentioned above, we can't leave out health care system or physical health references in favor of the other things that are listed now but have been left out for too long. Hard to do, I know :)	7/21/2017 9:21 AM
