

PROVIDER CHAMPIONS COUNCIL CHARTER

Purpose:

The Provider Leadership Council represents a group of provider champions and practitioners from the region necessary to improve the community health of our region. The BHT ACH recognizes the importance, value and requirement that physical and behavioral health providers will play in the Medicaid Transformation efforts. Additionally, the BHT ACH seeks to seize on the unique opportunity of the Medicaid Transformation to further engage additional community providers critical to the improvement health.

Members of the Provider Leadership Council will represent a specific constituency and will be expected to have the authority to make commitments on behalf of their employers, organizations, or constituencies. Panelists will also be expected to connect to others within their constituencies to ensure sufficient information sharing and necessary subject matter expertise.

Goals:

- Provide general clinical and subject matter expertise in all Medicaid Transformation Demonstration project areas.
- Design and support the implementation of processes in health system and clinic settings
- Prioritize key strategies for Collaborative Development
- Provide forum for updates and alignment of collaboration efforts related health improvement
- Act as a liaison to other providers to keep others informed on key decisions and projects
- Where appropriate, establish and oversee programs, measures, quality and barriers related to ACH and Demonstration initiatives
- The Council will monitor trends in performance across the Collaboratives to assess whether the Region is on track to achieve expected outcomes and will advise on the Collaboratives' proposed risk mitigation and continuous improvement strategies

Roles and Responsibilities:

With the support of the Executive Director, staff and consulting team, the Provider Leadership Council will provide key insights on Collaborative development and Medicaid Transformation Waiver projects. The BHT Board will retain final approval for all projects and priorities.

Membership:

Co-chairs: Dr. John McCarthy, BHT Board Member and Dr. Brian Seppi, Leadership Council Member
