

# WHAT WILL HELP US END THE VIOLENCE? YOUR IDEAS.

You're a key business leader in our community. That's why we're asking you to join a virtual focus group discussion and help us develop a Domestic Violence Toolkit for all area businesses. This toolkit will enable businesses of all sizes to offer employee training, develop workplace policies, and access support and help. Spokane has the highest reported rates of domestic violence in Washington, and this Domestic Violence Toolkit will be a key resource as we confront its root causes. As you can imagine, incidents of domestic violence have continued to increase in the last year, so this effort is more important than ever.

Please consider being part of this virtual focus group discussion. We want to hear your valuable suggestions and feedback.
